

SELVADHARSHINI.C

has completed the following course:

PROTECTING CHILDREN DURING THE COVID-19 PANDEMIC: ADAPTING CHILD PROTECTION PROGRAMMING **THE ALLIANCE FOR CHILD PROTECTION IN HUMANITARIAN ACTION**

The course covered topics including: the impact of public health measures on child protection services for children, risk and protective factors for children during the pandemic, the application of CPMS and guiding principles, suggestions on how to adapt child protection strategies working across sectors and with governments, the centrality of child safeguarding, social service workforce well-being, ensuring child participation and some considerations around working remotely with teams.

STUDY REQUIREMENT

6 weeks, 3 hours per week

LEARNING OUTCOMES

- Assess the context set through public health measures and elaborate on how this affects protective and risk factors for children in preparedness, response, transition and recovery to COVID-19
- Describe the main child protection risks during the COVID-19 pandemic in your context through a socioecological and developmental lens
- Explain ways to adapt child protection prevention and response programming in line with CPMS principles and standards
- Describe how to jointly implement with other sectors to protect children
- Identify key actions to support risk informed programming and contribute to system strengthening in future shock and health pandemics

SYLLABUS

- How the COVID-19 pandemic is affecting children, families and communities' lives and the potential medium-long term impact of the pandemic
- What actions you can take to adapt ongoing child protection prevention and response programming to the context of COVID-19 pandemic in line with CRC and CPMS principles and standards
- How you can collaborate with other sectors to promote children's protection and well-being in the context of COVID-19
- The experience of other child protection practitioners in a variety of contexts affected by the COVID-19 pandemic
