

RUBADHARSINI B

has completed the following course:

FUTURE-PROOFING THE HEALTH WORKFORCE GRIFFITH UNIVERSITY

In this course we looked at health workforce as a critical building block for strong health systems. Health workforce and skills shortages are a problem across the world, particularly in rural and remote areas. We explored how we keep the health workforce current, appropriately distributed and motivated. We examined the current challenges facing the health workforce and identified holistic and innovative strategies to attract, train, distribute and retain health workers.

STUDY REQUIREMENT

2 weeks, 3 hours per week

LEARNING OUTCOMES

- Describe health workforce and the role of the clinician manager/leader
- Apply an evidence-based workforce model to a given case study
- Discuss the complexities of an intergenerational and a globally mobile health workforce
- Explore innovative and sustainable strategies to proof the health workforce

SYLLABUS

- Health workforce- our people are the future
- Health workforce is a global concern
- Clinicians as workforce leaders
- Intergenerational workforce
- Globally mobile workforce
- Innovation and evidence based practice
