ECO CLUB

Skit play on Eco friendly Environment on 15.12.2017

REPORT

A skit is a very short play or performance. Drama makes a lesson more active, engaging and meaningful for students and participants and enhances critical and creative thinking skills, thus help students to formulate and express ideas and opinions.

A Skit play on Eco friendly Environment was done on 15.12.2017 in our college campus. Being Eco friendly means living in a way that is not harmful to the Environment. And this way of life is becoming important, as we need to protect our planet from manmade damage and this message was given to our College students by Enacting a skit by the club volunteers.
