### The Basics of Food Safety and Hygiene

The food industry is one of the world's biggest businesses. As the world's population continues to increase, so will the food industry's size and complexity. Therefore, making sure that the food we all consume is safe to eat must be a top priority for anyone who works in the food industry. It is estimated that in the United States alone, about 48 million people get sick from a food-borne illness every year.

#### Introduction to Immunology

Immunology is a branch of biology that studies the immune systems in all organisms. This course starts by discussing the role of the immune system which is to eliminate pathogens from the body. You will learn that phagocytes are cells that can engulf particles such as bacteria and other microorganisms or foreign matter, and look into their function in the nonspecific immune system. You will also study the role of B-lymphocytes in the humoral response.

#### An Introduction to DNA Damage

This free online course explores the causes and chemistry of DNA damage and lesion formation, which often leads to mutation of the genome and cancer. You will learn how DNA damage occurs and how the damaged DNA plays a role in developing mutations in the genome. You will see the structural changes in nucleobases that induce the mutations in the genome, which in turn is the reason for cancer.

#### Food Safety and Hygiene in the Catering Industry

This course will first introduce you to food safety and food hygiene. You will study the groups that are vulnerable to foodborne diseases as well as learn the signs and symptoms of these diseases. The course will then discuss the key facts and figures of food law that can help you work safely and productively. You will learn how food contamination and spoilage occurs, ways to prevent food contamination, and the responsibilities of food handlers.

#### Human Health - Diet and Nutrition

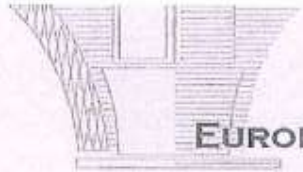

With this course, you will learn what the most macronutrients for your body are, and how to use this knowledge to craft your ideal diet. You will first learn a bit of science. The course will show you how carbohydrates are macronutrients that contain hydrogen and oxygen and can be broken down to release much-needed energy in the human body. Protein, on the other hand, builds and repairs tissues.

Study Time:  
1:26:31

### Basics of Virology

This free online Virology course begins by outlining an extensive definition of a virus. You will learn about the history behind the existence of viruses, as well as about various types of viruses and their properties. Next, you will learn about the virus infection cycle, how to measure the intensity of viruses in the infectious cycle and how to measure infectious and non-infectious particles.

### Modules Studied

- Module 1: Basics of Virology
- Module 2: Course assessment
