

## LIBRARY AUTOMATION SOFTWARE - KEY FEATURES

The Library Automation Software Lllips connect Net 12.0 and contains 3 modules, viz, web Library Main, Library WEB OPAC, and E-Gate Register.

1. **Library Main Software** helps not only to key in the Master data of Books, Non-Books, Periodicals, Back Volumes, and Library Users but also to do Transactions and take reports in various formats. Stock Verification can be done with the help of the latest tools like barcode scanners, RFID, etc, for which the features are in-built into the software. Displaying photographs and digital clips are available.
2. **Library OPAC** (Online Public Access Catalogue on the web) is a separate module, which helps the user of the library to search the Title, Author, Publisher, and Access. No. etc available in the library out of campus Users can reserve books and or cancel the reserved books. He can check out his dues and over-dues in the library. Provision for downloading the digital clips and taking printouts of some contents available. Library resources are made available for users with some restrictions.
3. **E – Gate Register** manages the entry and exit of users while scratching their id cards to record their visit to the library.
4. **Multiple gates** to monitor the Non-books
